Area Variance Continued

1. Explain how no undesirable change will be produced in the character of the neighborhood; nor a detriment to nearby properties created by granting the area variance.

We hope to add to the larger community by running a restaurant for families in the area.

2. Explain why the benefit sought by the applicant cannot be achieved by some method, feasible for the applicant to pursue, other than an Area Variance.

In order to meet the required parking, the lot needs to be extended, and we may fall short of the 46 spots.

3. Describe whether the requested Area Variance is substantial.

It is not a substantial addition to the lot, and we will be only a few spots short of the required number.

4. Explain how the proposed variance will not have an adverse effect on the physical or environmental conditions in the neighborhood or district.

We simply want to expand the current parking lot, and may not be able to reach 46 parking spots.

5. Explain whether difficulty is self-created. (Consideration is relevant, but should not necessarily preclude the granting of the Area Variance.)

The difficulty arises from our desire to use this building for a restaurant, converting it from a doctor's office.
